The Coding Bootcamp at UNC

December 2021 to Present

The provided part-time coding curriculum includes both front-end and back-end technologies, giving students thorough training to become full-stack web developers. The curriculum covers computer science concepts that are applied to JavaScript, algorithms, effectiveness, time complexity, big O notation, data structures, browser-based technologies like HTML/CSS, JavaScript/jQuery, responsive design, Bootstrap, and Handlebars, as well as storage options like local storage, session storage, and indexedDB. The course also covers React.js, databases like MySQL and MongoDB, server-side programming, user authentication, progressive web apps, the MERN stack (MongoDB, Express.js, React.js, Node.js), and API interaction using JSON and AJAX. Also, there are additional self-study subjects including Python, Java, Amazon Web Services, and C# available.
